

6th International Symposium for Farming Systems Design

Jean-Marc Meynard

Jean-Marc Meynard is senior scientist at INRA (Institut National de la Recherche Agronomique, France). He is an agronomist. He was head of the pluri-disciplinary division SAD (Sciences for Action and Development) at INRA between 2003 and 2012. Since 1980, his research was devoted to cropping system design, and integrated crop protection. Today, he works on distributed design of decision tools and cropping practices, in strong link with sociotechnical systems and agroecological transition. His works are embedded in the french scientific network IDEAS (Initiative for the Design in Agrifood Systems).
